

About 0800 Numbers

0800 - the number that's free and easy

The customer wins – so do you – with 0800

"Free" is one of the most powerful and seductive words in marketing. And, in the case of "Freephone", it is also one of the most profitable.

Phone calls that cost your customers nothing are an obvious attraction to them, but for your business the benefits of an 0800 Freephone number are even more appealing.

Boost your sales with 0800 numbers

Telecoms World's 0800 Freephone numbers can give your business a rapid increase in sales. Research shows that the number of phone inquiries you receive can quickly double, even triple, giving you more than an edge over your competitors.

National image

An 0800 number gives your company a confidence-inspiring national profile, showing you're not just interested in people in the immediate locality. This gives a message to customers that they are dealing with sound, reliable professionals.

Savings by the bundle

With a Telecoms World bundled phone package, you could end up paying less than 1p a minute for inbound calls you receive on your 0800 numbers. Not a bad price to pay for gaining new business.

Keeping your customers

Attracting new customers is, of course, vital for your business. But keeping them is equally important. If they can ring you for free from anywhere in the UK - with an 0800 number - they're more likely to stay with you.

0800 – the Number 1 number

The British use Freephone numbers more than any other nation in Europe. More than 60 per cent of consumers prefer to deal with companies offering 0800 numbers.

Memorable numbers

The more memorable your phone number, the more likely you are to bring new customers on board. Telecoms World has a choice of memorable 0800 numbers to help you maintain a high profile for your business.

Quick start

Telecoms World can have your 0800 number up and running within a few hours.

Take your 0800 number with you

If you change your business location, you don't have to change your 0800 number. It's yours for ever.

Use different 0800 numbers

0800 numbers are multi-purpose. You can use different numbers for various business campaigns.

Customer care

Research shows that nearly 70 per cent of people in the UK believe that companies who offer 0800 numbers care more about their customers.

It's free – any time

Calls to an 0800 number from a standard BT landline line cost your caller:

0.00p (peak)

0.00p (evening)

0.00p (weekend)

All Telecoms World 0800 numbers are able to receive calls from international destinations. Mobile, international and other networks charges may vary. All prices for 0800 numbers are ex VAT.

0800 numbers – mobile phone termination

Being able to terminate an 0800 Freephone number to a mobile phone has its advantages for some companies. You can, for instance, enjoy the flexibility of being able to take calls at any time and route calls to your mobile phone.

This is particularly useful for the mobile business or the smaller business that is away from a fixed-line telephone for any length of time.

An excellent example of this benefit is a long-time client of Telecoms World who started a mobile phone business by routing all sales calls to a mobile phone using an 0800 Freephone number. They grew the company from a man-and-wife team to become one of the largest mobile phone companies in the UK.

0800 numbers – international companies

Many international companies have good reason to be impressed with their 0800 numbers. One of Telecoms World's international customers has increased its sales from the UK by 25 per cent and believes that its 0800 toll-free Freephone number has contributed to this upturn.

0800 numbers – Smart Call handling

You can monitor your call statistics with [Vision](#), Telecoms World's detailed call information solution, which is updated every 15 minutes.

You can control where and when your calls go with [Call Planner](#), time of day routing, voicemail to e-mail, divert on busy and much more.

You can route your calls professionally to the correct department using our [Call Manager](#) solution.

You can record your calls using our [Net Planner](#) solution or queue your calls using our [Call Director](#) solution.
